

# Automating Appraisal

# Defining the process

## CURRENT

- **Manual**
- **Lengthy**
- **Not-eco friendly**

## FUTURE:

- **Automated**
- **Paperless**
- **Future-fit**

# Considerations

- **Team-wise KPIs** need to be entered by Line Managers for **multiple employees** even if team stays constant
- In case, **employees are on leave**, difficult to get their **signatures**
- Shift-based work hours → Difficult for line managers to **coordinate physical hardcopies**
- Physical hardcopies are **NOT eco-friendly**
- Physical hardcopies can get **LOST**
- Restrictions of Shopfloor- **not very digitally adept**
- Human Alterations we make, which needs to exist in potential automated system:
  - Scope for justification of scoring to functional heads
  - Scope for HR end approval dept-wise to ensure that we do not exceed limitation
  - Scope to assign line managers
  - Scope to have data checks before data gets locked
- **Live Dashboard Viewpoints:**
  - Line Manager & Employee
  - HR
  - Functional Heads (Summary Data)
